

GENERAL INFORMATION

It is our conviction that a Christian school is privileged to incorporate the Bible in academic studies. It is our goal that excellence be demonstrated in every area of our school.

Academic Information

Growing Lights Christian Academy (G.L.C.A.) offers 13 years of education from kindergarten through twelfth grade. The general spiritual objective within the pages of each of the basic academic subjects - Bible, English, Foreign Language, Health, Reading, Science, Social Studies, and Spelling is to train the child to see life from God's point of view; to shape attitudes and to mold character to the image of Christ. Electives offered provide the students with a great opportunity to enrich himself and widen his horizons beyond the core curriculum. Subjects may include art, music, physical education, keyboarding, and computer.

Enrollment

G.L.C.A. is a very unique school with the intent to help the average or above average child. We are not a correction, remedial, or alternative school equipped to handle problem children, slow learners, or disabled. We are aware of the great needs for such children, however, we presently are neither equipped with staff nor facilities to handle these special areas.

Correct placement of children is very important. Therefore, we reserve the right to place each child in the academic level for which we feel he is best suited. All applicants will be checked for proper grade placement. The students' acceptance into the school will be based upon a committee's evaluation, entrance examinations, and information from the previous school. A committee will interview each new student along with at least one of the parents before admission is approved. All students are accepted on a nine-week basis.
